25c higher established in containers.

Autumn. Medium sized buds and cupped double flowers of burnt orange streaked with red. The plant is a good grower and produces its moderately fragrant flowers freely. 50c.

Caledonia. Splendidly formed white large, long, pointed conical buds. Single long stems. 50c.

Catalonia. A startling new color in roses. No other red rosé can approach the combination of velvety orange-scarlet, vermillion, and cochineal red which Catalonia possesses. Richly fragrant. Plants are of medium height and of a bushy habit of growth. 75c.

Condesa de Sastago. This Spanish novelty is the first double rose to have the vivid colors of the brilliant species rose Austrian Copper. The bud is like a ball of gold with red stripes. When fully open the fiery copper and rich gold present a breath-taking contrast. 75c.

Countess Vandal (Plant patent No. 38). A vigorous grower and profuse bloomer, producing long pointed buds with distinctive shadings of coppery bronze, suffused with gold. The petals on the open flowers reflex with a silvery sheen. \$1.00.

Cuba. A very showy rose with its semi-double flowers of bright vermillion scarlet. Vigorous grower and excellent bloomer. 50c.

Dainty Bess. Five petal flowers borne in clusters of three. Delicate pink with a brownish-red overcast. 75c.

Dame Edith Helen. Big full double flowers of glowing pink produced on long stems. Vigorous grower. 50c.

Duchess of Athol. An outstanding rose of rich copper bronze flushed with orange and old rose, similar to Angele Pernet, but much more intense in coloring. A vigorous plant with bronzy foliage, and excellent stems. 50c.

Duquesa de Penaranda. This glorious rose produces two distinct types of flowers. During the Summer the pointed buds are a blend of apricot, orange, and dark pink. In the Fall the buds are a brownish color opening slowly to finely formed flowers of a cinnamon-peach color. A continuous bloomer. 75c.

E. G. Hill. An excellent scarlet rose that does not fade to blue, but turns to a deeper red as it develops. The flowers are quite double, sweetly scented, and are produced on excellent stems. 50c.

Etoile de Hollande. This variety is considered by many as the best red rose. Perfect buds of medium size that open into wonderfully fragrant flowers that hold their brilliant color to the end. 50c.

Federico Casas. This gay rose, carrying the colors that we associate with Sunny Spain, is one of the most desirable of the new "fancy" roses. The large and nearly double flowers are a lovely blend of copper and orange, and are pleasantly fragrant. A continuous bloomer with especially brilliant flowers in the cooler Autumn months. 75c.

Feu Joseph Looymans. A strong and upright growing rose that is greatly admired because of its pointed buds of tangerine yellow, with a very vivid apricot center and its excellent blooming qualities. 50c.

Gen. McArthur. The buds and open flowers are of the brightest crimson, retaining their color until they drop their petals. Blooms continuously. 50c.

Golden Emblem. Deep rich golden yellow, the buds being beautifully stained with carmine on the outside of the petals. The buds are well shaped, opening up very full. 75c.

Hadley. Color a deep, brilliant, velvety crimson which it retains all the year around. Flowers are borne on stiff upright stems. 50c.

Grenoble. The citizens of Grenoble, France, thought enough of this red rose to ask the originator, Charles Mallerin, to name it for their city. The plant is very vigorous and the blooms come on unusually long stems, making it one of the best garden roses for cutting. The buds are crimson, but the open flower is brilliant red, almost scarlet, and a bed stands out like a fire. 75c.

How to Care for Roses

Use Bandini
Complete Rose Food

For newly planted bare root roses, fertilize from ten to twenty days after time of planting. To hold the moisture and preserve the plant-food, use Bandini Steer Manure, Stockyard Manure, or Peat Moss as a mulch.

Pruning Roses

PRUNING A ROSE is not a great task and most people should be able to do a fairly neat job of it once they understand why Roses should be pruned.

All heavy pruning of the Rose should be done in the dormant season, which is from December 15 to February 1. Although all dead branches, affected by disease or other causes, should be removed as soon as noticed, any branches may be cut or removed at any time desirable in order to keep the bush in proper trim. Never allow the Rose to accumulate an excess of top-growth for lack of proper pruning, as this will result in a poor quality of Roses.

The principal reason for pruning is to remove the older branches from the bush in order to allow new growth as the blossoms always appear on young, tender growth and not on the older hard wood.

Should there be any doubt in your mind as to your ability in properly pruning your roses, you should get in touch with your nurseryman as he will be glad to inform you how to prune properly or have it done for you.

Heinrich Wendland. An outstanding rose because of its vivid color and vigorous growth. The large long pointed buds of nasturtium red unfold to show a reverse of brightest gold. 75c.

Hinrich Gaede. The brilliant shades of orange scarlet and vermillion make this one of the most vivid of the newer roses. Quite double flowers with rich sweet fragrance are borne on long stems. \$1.00.

Hoosier Beauty. Color a glowing crimson scarlet with darker shadings. Deliciously fragrant. Buds long, pointed. 50c.

J. Otto Thilow. Perfectly formed buds and flowers of rose pink. Very similar to Rose Marie in form and color but much larger and borne on excellent stems. 75c.

Kaiserin Augusta Victoria. White faintly suffused lemon-yellow. Flowers are very full and beautifully formed, with reflexed outer petals. 50c.

Lady Forteviot. Pointed buds of beautiful soft apricot that open to full double flowers with fruity fragrance. It is a strong grower with beautiful glossy foliage. 75c.

Los Angeles. Color a glorious flame-pink, shaded golden yellow. The bud is long and full; plant is strong, vigorous grower. Superb for cutting. 50c.

Lucie Marie. Large long buds of deep yellow, slightly veined with red, opening to a very large flower with pleasing fragrance. A strong grower and profuse bloomer. 50c.

Lulu. Long slender buds of coral-apricot. Very exquisite. 75c each.

Margaret McGredy. A magnificent rose of a glorious shade of brilliant orange scarlet. Large quite double flowers. Was awarded the Gold Medal of the National Rose Society. 50c.

Mary Hart (Plant patent No. 8). A sport of Talisman with buds of maroon red opening to well-formed blossoms of deep velvety red with an overflow of amber. An excellent cut rose. \$1.00 each.

Max Krause. A giant deep yellow rose with long buds and cup formed blooms. A vigorous grower and an excellent bloomer with disease resistant foliage. 75c each.

Miss Rowena Thom. A cross between Radiance and Los Angeles that combines the good qualities of both. Long pointed buds and large intensely fragrant flowers of oriental rose that shades lighter towards the outer portion of the flower. Free grower producing long stemmed flowers throughout the season. 50c.

Mrs. E. P. Thom. A very free and vigorous growing pure deep yellow rose with long pointed buds and well shaped flowers. 50c.

Mrs. Dudley Fulton (Plant patent No. 122). The bush is covered during the spring, summer and fall with good-sized, single, silvery-white flowers which do not discolor, always dropping their petals cleanly before they fade, and they make the plant look like a small snowstorm. One of the most remarkable things about this rose is the splendid evergreen foliage, which is always glossy as if varnished. \$1.00.

Pres. Herbert Hoover. Perhaps our most popular rose today. The large pointed vividly colored buds open slowly to well formed flowers of varying shades of pink, flame, scarlet and yellow. Vigorous grower. 50c.

Radiance. A lovely light silvery pink with suffusion of a deeper color. Exceedingly vigorous, hardy, disease resistant. 50c.

Red Radiance. Big cerise-red flowers borne on long heavy stems. Similar in growth to Pink Radiance. 50c.

Rev. F. Page Roberts. Inner face of the petals is a soft buff yellow, and the reverse is a rich salmon, while the buds are often stained with copper-red. Flowers large and double. Mildew proof foliage. 75c.

Rose Marie. A perfectly formed flower, rose-pink with beautifully veined petals. Free bloomer with long stems. An ideal pink garden rose. 50c.

Sister Therese. Chrome yellow buds tinged with carmine that open to show varying tones of yellow and apricot. A vigorous free branching grower. 75c each.

Souvenir de Mme. C. Chambard. These enormous pointed buds of coral color unfold slowly to a coral pink flower with a satiny peach tint. It is deliciously fragrant, and the long stems and perfect form make it a splendid rose for cutting. It is a free bloomer. 75c.

Talisman. A very vivid and highly colored rose of scarlet and gold. Has straight stiff stems, medium sized cup-shaped buds and is a very heavy bloomer. It was awarded a Gold Medal by American Rose Society. Very popular. 50c.

Texas Centennial. A duplicate of President Hoover in all but color which is a bright glowing carmine red changing to dark blood red in cool weather. Patent No. 162. 75c.

Ville de Paris. A clear sunflower yellow rose that does not fade in the hottest sun. Plant a vigorous, erect grower with glossy reddish-green foliage. Disease proof. 75c.

Will Rogers. Named in honor of a great American, the late Will Rogers. Dark velvety crimson in color. Strong and luxuriant in growth, this rose will be cherished in thousands of American gardens where it will serve fitly to commemorate the name of the man in whose honor it was named. Patent applied for. \$1.00.

CLIMBING ROSES

50c each; \$4.50 per 10 except as noted. Bare Root.

\$1.00 higher established in containers.

Belle of Portugal. Large flowers of soft shell-pink. Strong climber. Long pointed buds borne singly.

Clg. Ednah Thomas. A new everblooming climber producing enormous blossoms of a glowing rose pink color. The flowers are among the largest ever seen in a rose.

Clg. Cecil Brunner. One of the strongest-growing climbers. Color rosy pink, shaded to bright salmon in the center. A perfect little gem.

Clg. Dainty Bess. A true climbing form that should prove even more popular than the bush form. \$1.00.

Clg. Dame Edith Helen. A climbing sport of this popular variety. Large, full, double flowers of glowing pink that are delightfully fragrant and freely produced. 75c.

Clg. Golden Emblem. Produces large quantities of highly colored buds of golden yellow, with red shadings. 75c.

Clg. Hadley. Brilliant dark crimson, identical with the bush variety. Free flowering. 75c.

Clg. Hoosier Beauty. A true sport of this grand rose. Color a glowing crimson-scarlet.

Clg. Kaiserin. White, faintly suffused with lemon yellow. Identical with Kaiserin except in vigorous climbing habit.

Clg. Los Angeles. Identical with the bush variety; of strong climbing habit.

Mermaid. Beautiful single flowers of sulphur yellow with a golden center. An excellent bloomer with glossy foliage. Often used as a rambling shrub, as it is not a rank grower. 75c each.

Clg. Mrs. E. P. Thom. The exact duplicate of the bush form considered by most rosarians to be the finest yellow rose grown.

Clg. Pres. Hoover. The vigorous growing qualities of the bush rose. The same tones of red, pink, apricot, yellow. 75c.

Paul's Scarlet. Vivid scarlet, shaded crimson. Strong climbing habit and hardy. Very showy in spring.

Clg. Rose Marie. A deep pink in tone, long pointed buds and full double petal blooms. Growth is strong with thick foliage and very long stems. Exceedingly fragrant.

Clg. Talisman. Identical with the bush form of this popular variety except it is a splendid climber. Color gold, apricot and pink.
